CLARO

Model description

Design: Georg Appeltshauer

Frame: seat made of welded steel profile. Back carcass made of solid wood and chipboard; dowelled and glued. Footrest mechanism made of welded steel profile and screwed. All bearing points have maintenance-free machine construction bearings.

Seat springs: densely woven elastic straps. Depth of diagonal straps adjusts to set the seat hardness.

Upholstery: multi-layered seat cushions. In order to achieve casual style seat covers and improve their properties in use, the seat cushions have an additional 25-mm soft upholstery layer.

Armrests: **F:** armrest with feet in anodised aluminium, chrome gloss or solid beech. **B:** armrests floor level. Armrests available at the same price.

Seating comfort: Very good seating comfort has been achieved with the multi-layered construction and high quality materials.

Cover construction: the fabric and leather covers of the carcass have fixed upholstery. The cushion covers are loosely attached to the liners. The creasing that occurs in use is desired and typical of this design.

Footrests: there are footrests with 2 different functions: one with manual pull-out (FM-0230/92) and one with automatic activation (FM-0230/95). The manual pull-out can be fitted underneath the sofa on the left or right, and the position can be

changed at any time. With the automatic version, the position has to be stated in advance (to the left or right, seen from the front) since the lever has to be attached to the seat frame in advance. The position may be changed later on site by a member of our service team for a charge. The footrest with the automatic action can only be attached on the armrest side.

Function: two-seater sofa and sofa unit: The CLARO footrest can be installed on request either on the left and/or right underneath the seat of the two-seater. Installation at a later date is possible. There is a headrest cushion metal support built into the back corpus on both the left and the right sides of the sofa and the sofa unit.

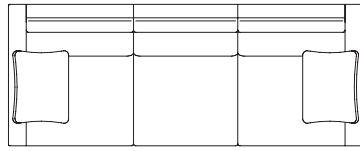

Three-seater sofa and sofa unit: On request it is possible to install a footrest and/or headrest cushion metal support in the middle section of the three-seated model at an additional price. **Recamiere:** There is a headrest cushion metal support built into the small corpus back on the attachment side. There is no headrest cushion support built into the corpus back along the length of the recamiere. It is technically not possible to install footrests on the recamiere. **Corner unit:** There is a headrest cushion metal support built into each side of the back.

Back function: Claro can also be supplied with an adjustable back on request. The back of each seat can then be adjusted continuously up to 20°. The adjustment is effected by a push button set in the armrest. On the three-seater sofa, the middle back is fixed. On the add-on elements, the back on the armrest side is adjustable; the other one is fixed. This function is not possible on the corner element or recamiere.

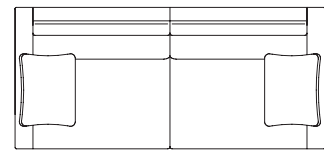

Arm/headrestcushion: the cushion in its function as a headrest can be individually positioned in two heights by an incorporated zip in the strap.

Connecting elements: The basic units are to be connected with a recamiere on one side. Two basic units can be connected with a corner unit.

Footrest: - footrest supporting arm: silver / special version: black coated
- footrest upholstered pad: upholstered panel, covered

Footrests: If ordering the footrest with the automatic action please state the position of installation,
i.e. to the left or right seen from in front.

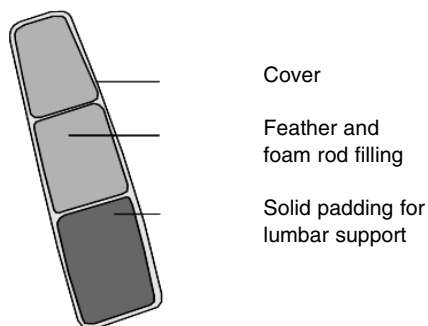

The footrest FM-0230/92 is operated manually, and can be fitted on the right and/or left of any sofa size and in centre of the SO 238 Sofa (FM-0230/03 & FM-0230/03KL) as soon as AE 226 L/R (FM-0230/39, FM-0230/39KL, FM-0230/40, FM-0230/40KL). The foot section with the automatic release FM-0230/95 can only be attached on the armrest side. Please note, that there is no possibility to install footparts underneath the recamiere-elements.

The footrest comes unassembled, packed separately in boxes.

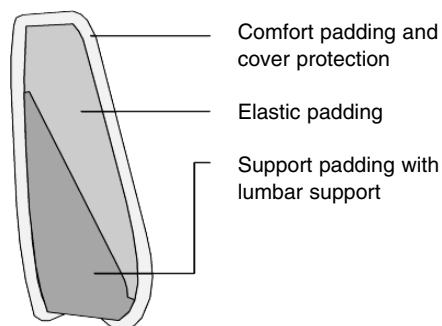

All legs come with slot-in glides for carpet and parquet floors.

Cushion padding

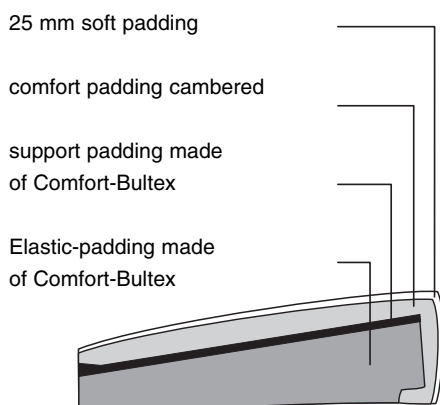

Standard back cushion

Special back cushion design

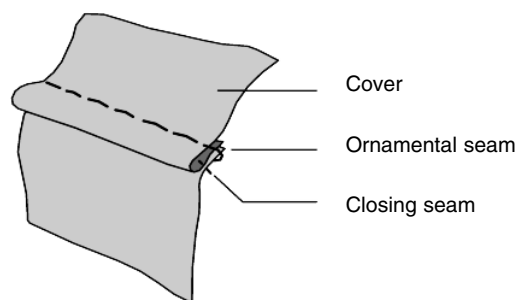

Seat cushion

Seam type

Fell seam

We do not process velours.

We use comfort Bultex in different strengths and volume weight for our high-quality padding. They exceed RAL requirements.

Enviromental balance

Frame: The beech-plywood construction is untreated. The metal frame has an epoxy resin coating.

Padding: The polyurethane foam used is produced with water vapour and is CFC-free.

Adhesives: Most of the adhesives are water-based products. For complex bonds, we now use adhesives containing reduced amounts of solvent.

Mechanical design: The pull-out mechanics are screwed to the seat frame and are removable. On recovering, it is overhauled and reused. The head cushion support is also removable and reusable.

Leather covers: The dyes in our shagreen are free from solvent on completion of the production process. Since 1985, FSM has processed leather with reduced chrome content and free from solvents. This exceeds German environmental standards.
